OBJECTIVE

Aspiring Artificial Intelligence Engineer and Data Scientist with hands-on experience in Machine Learning, Data Analytics, Computer Vision, and Deep Learning through multiple internships and real-world projects. Skilled in developing intelligent AI solutions, predictive models, and automation systems using Python, TensorFlow, PyTorch, OpenCV, and Scikit-Learn. Passionate about solving real-world problems through data-driven decision making and innovative AI technologies.

EDUCATION

Bachelor of Computer Science and Engineering Chartered Institute of Technology, Sirohi CGPA: 9.3	2024 – 2028
Senior Secondary (Class XII) – RBSE Physics, Chemistry, Mathematics (PCM) Score: 90%	2024
Secondary School (Class X) – RBSE Score: 91.83%	2022

SKILLS

Programming	Python, C, C++
Machine Learning	Scikit-Learn, TensorFlow, PyTorch, NumPy, Pandas
Data Analytics	Data Cleaning, Data Visualization, Statistical Analysis, EDA
Computer Vision	OpenCV, MediaPipe, YOLOv8, MobileNet SSD
Deep Learning	CNN, LSTM, Transfer Learning, Neural Networks
Frameworks	Flask, FastAPI
Databases	MySQL, MongoDB, SQL
Tools	Git, GitHub, VS Code, Jupyter Notebook, Google Colab, PyCharm
Soft Skills	Communication, Leadership, Teamwork, Problem Solving, Time Management

EXPERIENCE

Artificial Intelligence Engineer Intern Decodelabs (Remote)	May 2026 – Jun 2026
- Developed and deployed Artificial Intelligence and Machine Learning solutions across multiple real-world projects. - Built intelligent systems including AI chatbots, computer vision applications, predictive models, and recommendation engines. - Applied data preprocessing, feature engineering, model training, and evaluation techniques to improve model performance. - Worked with Python, Scikit-Learn, OpenCV, YOLOv8, and Deep Learning frameworks for end-to-end AI development.	
Data Analyst Intern Elevate Labs (Remote)	May 2026 – Jun 2026
- Performed exploratory data analysis and statistical analysis on structured datasets. - Cleaned, transformed, and visualized data to uncover trends and actionable insights.	

- Created reports and dashboards to support data-driven decision making.
- Utilized Python, Pandas, NumPy, and visualization techniques for analytical workflows.

Artificial Intelligence & Machine Learning Intern

Nov 2025 – Dec 2025

Elevate Labs (Remote)

- Developed machine learning models for classification and predictive analytics tasks.
- Implemented preprocessing pipelines, feature selection, and model optimization techniques.
- Worked on practical AI assignments involving real-world datasets and machine learning workflows.
- Strengthened expertise in model evaluation, performance tuning, and deployment concepts.

Data Scientist & Data Analyst Intern

Sept 2025 – Nov 2025

Zidio Development, Bengaluru

- Developed an Image Captioning System using CNN-LSTM architecture and transfer learning techniques.
- Optimized preprocessing and model training pipelines for improved caption generation quality.
- Trained models on the Flickr8k dataset and evaluated performance using multiple validation methods.
- Collaborated with team members on hyperparameter tuning and model performance enhancement.

PROJECTS

AI Object Detection & Smart Traffic Management System

[GitHub](#)

Developed an intelligent traffic monitoring system using YOLOv8, MobileNet SSD, OpenCV, and Python for real-time vehicle detection, counting, and traffic flow analysis. Designed to support smart city applications and automated traffic management systems.

Image Captioning System

[GitHub](#)

Built a deep learning application combining CNN and LSTM architectures to automatically generate image captions. Trained on the Flickr8k dataset and optimized preprocessing, tokenization, and transfer learning pipelines before deployment using Flask.

AI Job Recommendation System (Digital MatchMaker)

[GitHub](#)

Developed an AI-powered recommendation engine that matches user skills with relevant job roles using machine learning techniques, similarity scoring, and intelligent ranking algorithms to improve career recommendations.

Iris Flower Classification System

[GitHub](#)

Designed and trained a machine learning classification model using the Iris dataset to predict flower species based on sepal and petal measurements. Achieved high prediction accuracy through feature analysis and model evaluation.

Rule-Based AI Chatbot

[GitHub](#)

Built an intelligent rule-based chatbot capable of handling predefined conversational workflows and user queries. Implemented decision-based response logic to simulate real-world customer interaction scenarios.

CERTIFICATIONS & ACHIEVEMENTS

- Data Science Foundations Certificate – IBM Cognitive Class (DS0101EN)
- Artificial Intelligence Engineer Internship – Decodelabs
- Artificial Intelligence & Machine Learning Internship – Elevate Labs
- Data Analyst Internship – Elevate Labs

- Data Science and Data Analyst Internship – Zidio Development
- Ethical Hacking and Cyber Security Certifications – Internshala CEH, Mahindra CEH, Tata Cyber Security
- Cyber Security AI Roadmap Program (2025–2030)
- OutSkill AI Class Certificate focused on AI and ML Model Development
- Internship and Job Preparation Training – Cuvette
- Communication Skills Certificate
- Scaler Masterclass on AI and Software Development
